This book supports students preparing for the Edexcel GCSE exam. The practice papers in the book are carefully modelled after past papers and specifications of exam board to ensure that the papers as a whole provide a rich and varied practice to meet all requirements of GCSE mathematics with an appropriate difficulty. Papers are designed to teach students the most easily applicable, reusable and fastest solutions to typical problems, and utilise problems which target areas of maths which students typically forget under the pressure of an exam. Solutions provided have been reviewed by many students to ensure that they are easily understandable while being the fastest and most re-applicable.

This series offers complete coverage of Standard Grade targets, in a carefully considered order and is written by authors of New Maths in Action S1 and S2 to ensure progression from 5-14. There are three Teacher Resource Packs available for each year providing complete support for each of the Student Books.

Prepare for Excellence With This PERFECT TASC Math Practice Book! TASC test taker's #1 Choice! 5 TASC Math Practice Tests, which reflects the 2020 and 2021 test guidelines, is a comprehensive practice book to help you hone your math skills, overcome your exam anxiety, and boost your confidence -- and do your best to succeed on the TASC Math Test. This text has been developed to provide an easy-to-use course completely in line with the Mathematics 5-14 national Guidelines in Scotland. The book contains features designed to allow more effective teaching in the classroom. All material and exercises throughout the books in this series are clearly identified with a 5-14 level indicator while identical chapter titles and introductions enable mixed ability and streamed teaching.

Are current testing practices consistent with the goals of the reform movement in school mathematics? If not, what are the alternatives? How can authentic performance in mathematics be assessed? These and similar questions about tests and their uses have forced those advocating change to examine the way in which mathematical performance data is gathered and used in American schools. This book provides recent views on the issues surrounding mathematics tests, such as the need for valid performance data, the implications of the Curriculum and Evaluation Standards for School Mathematics for test development, the identification of valid items and tests in terms of the Standards, the procedures now being used to construct a sample of state assessment tests, gender differences in test taking, and methods of reporting student achievement.

Written specifically for the Foundation and Intermediate tier GCSE for the AQA Modular GCSE Specification B. This clearly presented book will help all students looking to achieve a grade C in GCSE maths. An ideal, stand-alone resource for students doing the GCSE course in one year including students resitting modules.
