GUIDE saves both the FIG-file and the code file using this name. If the folder in which you save the files is not on the MATLAB path, GUIDE opens a dialog box that allows you to change the current folder. GUIDE saves the files simple_gui.fig and simple_gui.m, and then runs the program. It also opens the code file in your default editor.

Create a button in GUIDE, and store and access data when the button is pressed. To do this, first add a field to the handles structure and use guidata to update and manage it. (Make sure to add the data to handles rather than overwriting it. For more information, see How GUIDE Uses guidata.)Then, configure a callback that uses guidata to access and store data when the button is pressed.
