Stateflow - MATLAB & Simulink

The matrix-based MATLAB language is the world's most natural way to express computational mathematics. Built-in graphics make it easy to visualize and gain insights from data. The desktop environment invites experimentation, exploration, and discovery. These MATLAB tools and capabilities are all rigorously tested and designed to work together.

A significant feature when using Enterprise Architect's SysML simulation is the ability to generate MATLAB Stateflow diagrams to be run under Simulink, allowing you to guide your SysML simulations using StateMachines modeled in Enterprise Architect that are translated to Stateflow diagrams. The Stateflow diagrams use elements and connectors that have close equivalents to the OMG StateMachine standard, such as States and Transitions.
