practice that will promote better scores—in class and on achievement tests

- A pretest to help identify areas where students need more work
- End-of-chapter tests to measure students' progress
- A helpful glossary of key terms used in the book
- More than 1,000 math problems with answers

Topics covered:

*Page 46/50*

# Machines Sky

# Where To Download

- Place values and estimating
- Number properties and order of operations
- Negative numbers and absolute value
- Factors and multiples
- Solving problems with rational numbers
- Ratios and proportions
- Percent
- Exponents and scientific notation
- Solving equations and inequalities

Machines Sky

# Where To Download

- Customary and metric units of measure, including conversions
- Solving problems by graphing points on the coordinate plane
- Classifying polygons based on their properties
- Calculating perimeter, area, surface area, and volume
- Data presentation
- Statistical variability,
