Public Policy Analysis, the most widely cited book on the subject, provides readers with a comprehensive methodology of public policy analysis. Starting from the premise that policy analysis is an applied social science discipline designed for solving practical problems facing public and nonprofit organizations, the book bridges the gap between theory and practice. It provides practical skills for conducting policy analysis and communicating findings through memos, position papers, and other forms of structured analytical writing. The book asks readers to critically analyze the arguments of policy practitioners as well as political scientists, economists, and political philosophers.

This interdisciplinary volume provides a novel perspective on social aspects of language. It views ways of how the acquisition and management of knowledge of ourselves and others is reflected in language. Hence, by combining the two disciplines social cognition and linguistics, it proceeds beyond cognitive linguistics by examining language from a wider perspective including cultural issues.

Accessible yet theoretically rich, this landmark text introduces key concepts and issues in critical discourse analysis and situates these within the field of educational research. The book invites readers to consider the theories and methods of three major traditions in critical discourse studies — discourse analysis, critical discourse analysis, and multimodal discourse analysis -- through the empirical work of leading scholars in the field. Beyond providing a useful overview, it contextualizes CDA in a wide range of learning environments and identifies how CDA can shed new insights on learning and social change. Detailed analytic procedures are included — to demystify the process of conducting CDA, to invite conversations about issues of trustworthiness of interpretations and their value to educational contexts, and to encourage researchers to build on the scholarship in critical discourse studies. This edition features a new structure; a touchstone chapter in each section by a recognized expert (Gee, Fairclough, Kress); and a stronger international focus on both theories and methods. NEW!
