Earth science is the study of Earth and space. It is the study of such things as the transfer of energy in Earth's atmosphere; the evolution of landforms; patterns of change that cause weather; the scale and structure of stars; and the interactions that occur among the water, atmosphere, and land. Earth science in this book is divided into four specific areas of study: geology, meteorology, astronomy, and oceanography. - p. 8-9.

This is the chapter slice "Rocks and Minerals Gr. 1-5" from the full lesson plan "Hands-On - Earth & Space Science". Inspire your students to gain a deep understanding of our planet earth and beyond with our Hands-On Earth & Space Science resource for grades 1-5. Combining Science, Technology, Engineering, Art, and Math, this resource aligns to the STEAM initiatives and Next Generation Science Standards. Make your own weather forecast as a group. Find out how much rain has fallen by building your own rain gauge. Get a glimpse at how wind works by creating your own sand dunes. Tell a story by drawing your own rock layer. Get into groups to make your own solar cell, windmill, or water wheel. Track the movement of the Moon with your own Lunar Calendar. Each concept is paired with hands-on experiments and comprehension activities to ensure your students are engaged and fully understand the concepts. Reading passages, graphic organizers, before you read and assessment activities are included.
