In 1993, in a study conducted by Frances Rauscher, Gordon Shaw, and Catherine Ky, which was later published in the renowned and well-established journal Nature, found that participants performed better in spatial-temporal reasoning tasks when listening to Mozart's sonata K. 448 than when they were listening to verbal relaxation instructions, or when they listened to nothing. However, the effects were temporary and wore off after 15 minutes.

[Does listening to Mozart really make you smarter?](#)

Though not the first study on how Mozart's tunes affect the epileptic brain, a recent, more in-depth study by the European College of Neuropsychopharmacology found that listening to Mozart daily significantly reduced the participants' number of epileptic seizures. It also reduced the frequency of epileptiform discharges, which are abnormal brain activities in epileptic individuals.

[Can listening to Mozart help with this? | health enews](#)

But Glenn Schellenberg, a psychology professor at the University of Toronto, has debunked such belief. He asserted that listening to Mozart may be emotionally soothing and pleasant to listen to, but it does nothing more than surging up dopamine levels in the brain, something that eating chocolates can also do.

This Is Why Classical Music Lovers Are Smarter

3 July 2013, 10:44 | Updated: 10 July 2013, 16:18. A new study in Israel has revealed that premature newborn babies are more conducive to development if they listen to the music of Mozart rather than Bach. The study took 12 premature babies born in the 30th week of pregnancy with a similar weight, and played them the same excerpts of music over a three-day period through earphones placed in their incubators.

Mozart better than Bach for premature babies - Classic FM

The idea that listening to classical music can increase your brainpower has become so popular that it's been dubbed "the Mozart effect." So how did this myth start? So how did this myth start? In the 1950s, an ear, nose and throat doctor named Albert Tomatis began the trend, claiming success using Mozart's music to help people with speech and auditory disorders.

Top 10 Myths About the Brain | HowStuffWorks

For example, in experiments, people who listened to Mozart's music experienced greater drops in blood pressure than did people listening to the music of Johann Strauss, ABBA, or the Beatles (Trapp and Voit 2016; Gruhlke et al 2015). But other studies have suggested that personal preferences are important.

The Mozart effect: The truth behind the claims

By Maddy Shaw Roberts With the rise of streaming services, young people are listening to more Mozart and Bach than they did 10 years ago. And during lockdown, classical music has experienced a second boom.
