operational safety (including the safety of the public, themselves and their co-workers). It is of particular interest to railway infrastructure controllers, all train/tram operating companies, maintenance/renewal companies, and their contractors/subcontractors.

This publication is aimed at managers in all industries. It explains why human factors are important in health and safety and how they need to be assessed and managed in the same way as other risk factors. It gives practical advice on how to develop systems designed to take account of human capabilities and fallibilities.

The Fourth Edition of this essential health and safety guide has been revised to meet the February 2010 specification for the NEBOSH National

Diploma in Occupational Health and
Safety.

This is the 4th edition of the IET's Code of Practice for Inservice Inspection and Testing of Electrical Equipment. The book has been revised to take account of the PAT aspects of Professor Löfstedt's report and the HSE view that promotes a proportionate riskbased approach when assessing the safety of electrical equipment and appliances. This will help users, those responsible for the equipment and testers of the equipment to maintain safety. HSE encourages the adoption of this approach and the changes will also be reflected in the City & Guilds 2377 course. The Code of Practice enables duty holders to understand the requirements placed on them in law to
