The Making of Cannabis Oil : All You Need to Know Abot ...

With New York lawmakers considering legalizing recreational marijuana for adults, WXXI News reporter Veronica Volk shares a few things you should know.

Written for first-time growers, Marijuana 101 will help those who don't have endless supplies of time and money, but are still looking to find success with a small personal crop. Starting from the very beginning, Professor Lee walks the reader through issues often overlooked in more exhaustive books. He discusses what to think about before even choosing to grow, how to keep it secret and, most usefully, how to keep it cheap. He then covers what to buy and where, how to make sense of the equipment available, the merits of different grow techniques and basic bud history and theory.

From the leading authority on marijuana—a man who has served as White House advisor on drugs to three different administrations and who NBC News once called “the prodigy of drug politics”—comes the remarkable and shocking exposé about how 21st century pot, today’s new and highly potent form of the drug, is on the rise, spreading rapidly across America by an industry intent on putting rising profits over public health. Smokescreen: What the Marijuana Industry Doesn't Want You to Know examines the inside story behind the headlines, containing accounts from Sabet’s time in the Obama administration to stunning revelations from whistleblowers speaking out for the first time. What it finds is how the marijuana industry is running rampant without proper oversight, leaving Americans’ health seriously at risk. Included are interviews with industry insiders who reveal the hidden dangers of a product they had once worshipped. Also contained in these pages are insights from a major underground-market dealer who details how legalization is hastening the growth of the illicit drug trade. And more to the heart of the issue are the tragic stories of those who have suffered and died as a result of marijuana use, and in many cases, as a result of its mischaracterization. Readers will learn how power brokers worked behind the scenes to market marijuana as a miracle plant in order to help it gain widespread acceptance and to set the stage for the lucrative expansion of recreational pot. The author of this compelling first-person narrative leading the national fight against the legalization of cannabis through his nonprofit, Smart Approaches to Marijuana (aka SAM) is Kevin Sabet. As a policy advisor to everyone from county health commissioners to Pope Francis, and a frequent public speaker on television, radio and through other media outlets, his analysis is consistently relied upon by those who recognize what’s at stake as marijuana lobbyists downplay the risks of massive commercialization. A book several years in the making, filled with vivid characters and informed by hundreds of interviews and scores of confidential documents, Sabet’s Smokescreen lays bare the unvarnished truth about marijuana in America.

In “a brilliant antidote to all the...false narratives about pot” (American Thinker), an award-winning author and former New York Times reporter reveals the link between teenage marijuana use and mental illness, and a hidden epidemic of violence caused by the drug—facts the media have ignored as the United States rushes to legalize cannabis. Recreational marijuana is now legal in nine states. Advocates argue cannabis can help everyone from veterans to cancer sufferers. But legalization has been built on myths—that marijuana arrests fill prisons; that most doctors want to use cannabis as medicine; that it can somehow stem the opiate epidemic; that it is beneficial for mental health. In this meticulously reported book, Alex Berenson, a former New York Times reporter, explodes those myths, explaining that almost no one is in prison for marijuana; a tiny fraction of doctors write most authorizations for medical marijuana, mostly for people who have already used; and marijuana use is linked to opiate and cocaine use. Most of all, THC—the chemical in marijuana responsible for the drug’s high—can cause psychotic episodes. “Alex Berenson has a reporter’s tenacity, a novelist’s imagination, and an outsider’s knack for asking intemperate questions” (Malcolm Gladwell, The New Yorker), as he ranges from the London institute that is home to the scientists who helped prove the cannabis-psychosis link to the Colorado prison where a man now serves a thirty-year sentence after eating a THC-laced candy bar and killing his wife. He sticks to the facts, and they are devastating. With the US already gripped by one drug epidemic, Tell Your Children is a “well-written treatise” (Publishers Weekly) that “takes a sledgehammer to the promised benefits of marijuana legalization, and cannabis enthusiasts are not going to like it one bit” (Mother Jones).

For more than 25 years, the renowned Amen Clinics has been a front line resource for brain health . . . NOW theY TACKLE all your questions about how marijuana affects your brain—and the brain of your child. Since marijuana became legal in many states, people of all ages are using it for pain relief and treatment of a variety of illnesses and ailments. But is it safe? In this comprehensive book, renowned psychiatrist and licensed prescriber of medical marijuana Dr. Rebecca Siegel delivers the most complete guide yet about the benefits and risks of using marijuana today. Based on the latest scientific research, this easy-to-read book busts all the myths and helps you navigate the sometimes confusing and often-changing world of marijuana. Within these pages you'll discover a wealth of invaluable information, including:
• Why medical marijuana is vastly different than CBD and recreational marijuana—especially when it comes to children and teenagers
• Evidence-based information on how cannabis is being used to treat an array of ailments and conditions
• The difference between various marijuana delivery systems, including edibles
• Why marijuana-induced psychosis has risen 450% among current pot users, resulting in increases of depression and suicide
• How to talk to teens or young adults about recreational marijuana use in a way that brings you closer
• How marijuana affects mood, productivity, and overall brain health
• Long-term vs. short-term risks for teens, adults, and older adults
With a foreword by renowned psychiatrist and brain health expert Dr. Daniel Amen. The Brain on Cannabis reveals everything you ever wanted to know about marijuana so you can make informed decisions for yourself—and your loved ones.

Packed with useful tips and delicious recipes from a slew of experts, Weed covers smoking, cooking, and growing cannabis, as well as proper stoner etiquette and a guide to must-visit destinations around the world. Not too long ago, it might have seemed impossible that cannabis would step out of the shadows into the mainstream. But now, as legalization sweeps the globe, a new weed culture is evolving with its own set of rules--and thousands of new devotees eager to learn them. Journalist Michelle Lhooo lives in Los Angeles and is at the forefront of this revolution. Through her own expertise as well as interviews with stars from the weed scene, she presents a captivating glimpse into the wild new frontier of cannabis. This witty, insightful guidebook offers useful tips on how to smoke joints, vapes, and concentrates; make edibles and infused cocktails; grow the plant at home; and find the best cannabis stores. It imparts the wisdom of renowned potheads such as pioneering dub music producer Lee "Scratch" Perry and includes interviews with the cannabis industry's most exciting and innovative figures, from a lauded chef who puts on a gourmet weed dinner series, to the editors of a weed-centric magazine, to a "cannaxexual" sex educator, and more. Complete with vibrant new hand-drawn illustrations by the artist Thu Tran, Weed is cutting-edge, comprehensive, and brimming with sparkling personalities--an essential introduction to pot for both newbies and die-hards alike.

A woman’s handbook to demystifying the world of weed, whether it’s being used for pain relief, a moment of calm, or a fit of giggles. Women of all ages are using cannabis to feel and look better. For rookies and experienced marijuana users alike, this lively, information-filled book is just the supportive guide you need to find the right dose to relieve anxiety, depression, and inflammation, and mitigate the onset of dementia and other signs of aging. Plus boost moods, ease aches, even lose weight, and get restful sleep. And a dose just for fun? Well, that works, too! Here's how to navigate the typical dispensary, with its overwhelming options of concentrates, edibles, vape pens, and tinctures. Understand the amazing health-giving compounds found in cannabis—THC, CBD, terpenes, and more—and how to use topicals to reduce pain and give your skin a healthy glow. There's even advice on how not to get high but still reap all the amazing health benefits. Plus over twenty recipes, from edibles like Classic Pot Brownies and Netflix and Chill Caramels to self-care products like Radiant Glow Serum and Happy Body Bar.

Should we legalize marijuana? If we legalize, what in particular should be legal? Just possessing marijuana and growing your own? Selling and advertising? If selling becomes legal, who gets to sell? Corporations? Co-ops? The government? What regulations should apply? How high should taxes be? Different forms of legalization could bring very different results. This second edition of Marijuana Legalization: What Everyone Needs to Know® discusses what is happening with marijuana policy, describing both the risks and the benefits of using marijuana, without taking sides in the legalization debate. The book details the potential gains and losses from legalization, explores the "middle ground" options between prohibition and commercialized production, and considers the likely impacts of legal marijuana on occasional users, daily users, patients, parents, and employers - and even on drug traffickers.

A pragmatic and informative look at better living through cannabis. Cannabis. Weed. Bud. Whatever you choose to call it, it's been a health aid, comfort, and life-enhancer for humankind for more than three thousand years. But while cannabis is used by hundreds of millions of people around the world, more than a century of prohibition has resulted in confusion about its status: Is it healthy? Is it medicinal? Will it make you crazy? In this fun, illuminating book, cannabis journalist Amanda Siebert delves deep into the latest research to separate marijuana fact from fiction, revealing ten evidence-based ways this potent little plant can improve your life. She speaks with some of the world's top researchers, medical professionals, and consultants to answer questions such as: Can cannabis help you get a full night's sleep? Does it aid in exercise and weight loss? Can it really cure cancer? She also offers practical advice for enjoying its benefits, including easy-to-follow, step-by-step instructions for consumption and dosage, as well as examples of real people who have used this drug to enhance their lives. Cannabis, it turns out, could be life-changing: it can enrich any diet, slow down aging, and even spice things up in the bedroom.

Leading experts on the science, history, politics, medicine, and potential of America's most popular recreational drug
• With contributions by Andrew Weil, Michael Pollan, Lester Grinspoon, Allen St. Pierre (NORML), Tommy Chong, and others
• Covers marijuana's physiological and psychological effects, its medicinal uses, the complex politics of cannabis law, pot and parenting, its role in creativity, business, and spirituality, and much more Exploring the role of

cannabis in medicine, politics, history, and society, The Pot Book offers a compendium of the most up-to-date information and scientific research on marijuana from leading experts, including Lester Grinspoon, M.D., Rick Doblin, Ph.D., Allen St. Pierre (NORML), and Raphael Mechoulam. Also included are interviews with Michael Pollan, Andrew Weil, M.D., and Tommy Chong as well as a pot dealer and a farmer who grows for the U.S. Government. Encompassing the broad spectrum of marijuana knowledge from stoner customs to scientific research, this book investigates the top ten myths of marijuana; its physiological and psychological effects; its risks; why joints are better than water pipes and other harm-reduction tips for users; how humanity and cannabis have co-evolved for millennia; the brain's cannabis-based neurochemistry; the complex politics of cannabis law; its potential medicinal uses for cancer, AIDS, Alzheimer's, multiple sclerosis, and other illnesses; its role in creativity, business, and spirituality; and the complicated world of pot and parenting. As legalization becomes a reality, this book candidly offers necessary facts and authoritative opinions in a society full of marijuana myths, misconceptions, and stereotypes.

Matt Mernagh's Marijuana Smoker's Guidebook is the ultimate field guide for marijuana. Featuring 180 commercially-available cannabis strains from around the world, this book shows readers how to identify and enjoy the buds they've got and work out the buds they want. Every strain in the book has been tested by author Matt Mernagh himself and includes an informative, original and entertaining write up and high resolution photograph. This indispensable resource covers everything from Barney's Farm's LSD to the elusive Jean Guy, and many more of the world's favourite smokes.
