NX8-E PROGRAMMING WORKSHEETS

After futzing more with this today, I realized that the keypad was set at address 3. I used address 208 for programming, and I did hear a "ding-dong" when I programmed the wireless door sensor in (I tried Zone 27 because it was the next zone in sequence from Zones 25 and 26), but when I hit exit and the panel rebooted, the ready light remained illuminated no matter where I placed the contact.

User Manual Download for Networx NX-8 from CADDX

If you own a Networx NX-8 panel, we hope this post has helped you understand how to troubleshoot your alarm. Compared to the Concord 4 panel that we discussed last week, we find that the NX-8 provides many additional features. This panel has more onboard power and far more programming menus and options than its Concord counterpart.
