The growing concern over the number of accidental firearm shootings, especially those involving children, prompted passage of the initial handgun safety law which went into effect in 1994. The stated intent of the California Legislature in enacting the current FSC law is for persons who obtain firearms to have a basic familiarity with those firearms, including, but not limited to, the safe handling and storage of those firearms. The statutory authority for this program is contained in Penal Code sections 26840 and 31610 through 31700. These statutes mandate DOJ to develop, implement and maintain the FSC Program. Pursuant to Penal Code section 26840, a firearms dealer cannot deliver a firearm unless the person receiving the firearm presents a valid FSC, which is obtained by passing a written test on firearm safety. Prior to taking delivery of a firearm from a licensed firearms dealer, the purchaser/recipient must also successfully perform a safe handling demonstration with that firearm..

Master technique, improve accuracy, and achieve competitive excellence. In Rifle: Steps to Success, Olympic gold medalist, world record holder, and respected coach Launi Meili shares the training secrets used by the top shooters in the sport. Rifle: Steps to Success covers every aspect of the sport: Equipment selection and fitting Safe shooting guidelines Proven techniques for improved accuracy in the prone, standing, kneeling, and sitting positions Mental and physical training Shooting drills to increase all-around consistency Practice, prematch, and competitive routines As part of the Steps to Success Series—with more than 1.5 million copies sold—Rifle: Steps to Success will help you hit your mark every time. ContentsStep 1. Selecting and Fitting Equipment Step 2. Shooting Safely and Responsibly Step 3. Getting to Know the Rifle Step 4. Shooting Positions and Form Step 5. Aiming and Adjusting the Sights Step 6. Taking the Shot Step 7. Preparing for Competition Step 8. Competing in Matches Step 9. Practicing for Optimal Performance Step 10. Training Mentally and Physically Step 11. Continuing in the Sport

The 2018 National Defense Authorization Act required an evaluation of the Corporation for the Promotion of Rifle Practice and Firearms Safety and its Civilian Marksmanship Program. This report summarizes the RAND Arroyo Center evaluation.

This report presents the recommendations of a WHO Expert Committee commissioned to coordinate activities leading to the adoption of international recommendations for the production and control of vaccines and other biologicals, and the establishment of international biological reference materials. Following a brief introduction, the report summarizes a number of general issues brought to the attention of the Committee. The next part of the report, of particular relevance to manufacturers and national regulatory authorities, outlines the discussions held on the development of revised WHO Recommendations and Guidelines for a number of vaccines, blood products and related substances. Specific discussion areas included the development of WHO guidance on the quality, safety and efficacy of poliomyelitis vaccines (oral, live, attenuated); recombinant malaria vaccines; diphtheria vaccines (adsorbed); tetanus vaccines (adsorbed); combined vaccines based on diphtheria and tetanus vaccines; and Japanese encephalitis vaccines (live, attenuated). Subsequent sections of the report then provide information on the current status and proposed development of international reference materials in the areas of vaccines and related substances; blood products and related substances; in vitro diagnostic device reagents; biotherapeutics other than blood products; and antibiotics. A series of annexes are then presented which include an updated list of WHO Recommendations, Guidelines and other documents on biological substances used in medicine (Annex 1), followed by a series of WHO Recommendations and Guidelines adopted on the advice of the Committee (Annexes 2-7). All additions made during the meeting to the list of International Standards and Reference Reagents for biological substances maintained by WHO are then summarized in Annex 8.
