The 4.236 followed the 6.354 in introducing direct injection into the Perkins range on both on/off highway engines, being the first 4 cylinder direct injection engine offered for on-highway use. The first direct injection engine offered by Perkins was the 4.270D introduced in 1957 but was limited to off-highway use. This reflected a growing trend for the technology across the industry. Where ...

Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Ing Joseph Amato was born on the island of Malta during the years of WWII and started his sailing days while the island was a major British naval base in the Mediterranean. Having received his education at St. Augustine ’ s College and later his engineering apprenticeship at the than Royal Naval Dockyard in Malta, he went on to follow a thirty-year sea-going career in the British Mercantile Marine, starting from coastal British and European ports, Baltic and Irish seas as far as Spitzbergen, Greenland and Icelandic ports. At twenty-nine years he obtained his class I, followed with a tanker endorsement on steam and motor propulsion and moved on to deep sea shipping, engaging himself on long distance voyaging, and as requested by various shipping companies. Now Joseph has retired from “ pushing ” tankers (VLCC) around the globe and prefers to enjoy his days afloat, propelled by the wind on his ketch-rigged sailing boat.

An invaluable handbook of basic care and advanced servicing of marine diesel engines up to 150 hp. Any owner reading this will gain a better understanding of his engine, and will improve his ability to cope with any problems that may arise. The book is clearly illustrated throughout, and well-known brands of engines are used as guides.

The Journal of the Molly B is my personal diary of the building of my dream. The building of a boat is a simple idea but in practice is more like a labor of love, which exceeds all expectations. The task is at times an overwhelming undertaking, which is reminiscent of the insignificance one feels in the middle of that vast and seemingly endless expanse of water, called an ocean, you feel so small and so alone. You at times feel as though it's an impossible task. Without the knowledge or experience, to solve the many problems that arise as you proceed along your course toward the completion of your vessel, you are constantly reminded of your shortcomings. I can assure you, it is not an impossible task! It took me 12 years but the Molly B is finally in the water and fulfilling our dream of living on the water. It's well worth the time and effort but you'll never finish it if you don't get started, you just have to take that first step and go for it.

Anyone who wants a cruising yacht -- can have one!Just build it yourself. You can do it, there is a multitude of help out there.All you really need is the perseverance to complete the project. Volume I of "The Building of a Dream" covers building a model, site preparation , hull construction, and engine rebuild. 396 photographs in 148 pages illustrate every step of the process accompanied by a detaild explanation of how I did it.
