1st ed. v. 1. From the ancient Near East through the age of absolutism -- v. 2. From early modern era through contemporary times.

Perspectives in Sociology provides students with a lively and critical introduction to sociology and to the ways in which sociologists are trained to think and work. The subject is presented as a sequence of different perspectives on the social world, all of them interrelated, sometimes in conflict with one another, and all contributing important and necessary insights. The discussion is backed up by extensive reference to empirical studies. This edition has been completely revised. A chapter on critical theory has been added in order to reflect the extensive work and thinking that Marx's basic work continues to stimulate. The chapter on research strategies now takes account of new developments in the philosophy of science that are relevant for sociological approaches. Throughout, the authors have rewritten extensively in their continuing desire to produce clarity, and to respond to the comments of students and teachers.

affordable, compact format.

This addition to Anissa Rogers' bestselling *Human Behavior in the Social Environment* expands the original text with new chapters on spirituality, families and groups, organizations, and communities. Written in the compact, concise manner of the original text, the new chapters cover mezzo and macro contexts, and offer additional material valuable to two- and three-semester HBSE courses.

Now in full color throughout, this engaging, up-to-date, chronological introduction presents human prehistory within a framework of themes, issues, and debates. Featuring a consistent chapter format and an appropriate level of detail for students with no previous exposure to archaeology, it also offers outstanding pedagogy, including maps, timelines (interactive on the companion Online Learning Center website), chapter summaries, and lists of key terms.

Part One of this text examines educational themes in the historical context in which they first appeared. Corresponding Part Two chapters return to these themes and examine them in their contemporary contexts. Throughout, the relationship between social conditions, prevailing ideologies and educational practice is stressed.

Used by more than a million students since its original publication, *Western Civilizations* became the leading text for the course by combining historical scholarship with classroom innovation. Master scholars/teachers Joshua Cole and Carol Symes enhance coverage of the West in a global context with a new focus on migration and nationalism. Dynamic digital resources, including award-winning InQuizitive activities and new History Skills Tutorials for every chapter, guide students from basic understanding basics to analysis and interpretation.

years.”—Harvard Business Review This revised edition of the bestselling classic is based on fifteen years of experience in putting Peter Senge’s ideas into practice. As Senge makes clear, in the long run the only sustainable competitive advantage is your organization’s ability to learn faster than the competition. The leadership stories demonstrate the many ways that the core ideas of the Fifth Discipline, many of which seemed radical when first published, have become deeply integrated into people’s ways of seeing the world and their managerial practices. Senge describes how companies can rid themselves of the learning blocks that threaten their productivity and success by adopting the strategies of learning organizations, in which new and expansive patterns of thinking are nurtured, collective aspiration is set free, and people are continually learning how to create the results they truly desire. Mastering the disciplines Senge outlines in the book will:

- Reignite the spark of genuine learning driven by people focused on what truly matters to them
- Bridge teamwork into macrocreativity
- Free you of confining assumptions and mindsets
- Teach you to see the forest and the trees
- End the struggle between work and personal time

This updated edition contains more than one hundred pages of new material based on interviews with dozens of practitioners at companies such as BP, Unilever, Intel, Ford, HP, and Saudi Aramco and organizations such as Roca, Oxfam, and The World Bank.
