## Positive psychology - Wikipedia

Happiness is linked to lower heart rate and blood pressure, as well as healthier heart rate variability. Happiness can also act as a barrier between you and germs – happier people are less likely to get sick. People who are happier enjoy greater protection against stress and release less of the stress hormone cortisol.

The Science of Happiness | edX

Known as the science of happiness, positive psychology is officially ‘ the study of optimal functioning ’ . Hedonic wellbeing is the feel-good side to happiness – those peak moments of positivity that are about enjoyment and pleasure, while eudaimonic wellbeing is the deeper happiness that comes from having a sense of meaning and purpose.
