Dispersion | Teaching Resources

In optics, dispersion is the phenomenon in which the phase velocity of a wave depends on its frequency. Media having this common property may be termed dispersive media. Sometimes the term chromatic dispersion is used for specificity. Although the term is used in the field of optics to describe light and other electromagnetic waves, dispersion in the same sense can apply to any sort of wave ...

The Diversity Training Handbook:
A Practical Guide to ...

A memorandum of understanding (MOU), also referred to as a letter of intent (LOI) or term sheet, between a seller and buyer or a service provider and customer, in a commercial transaction. This model MOU is nonbinding, but also includes commonly used binding provisions such as due diligence, confidentiality, governing law, no third-party beneficiaries and expenses.
