Third Edition builds a conceptual framework of cell biology using 14, easy-to-understand principles to show how cells function and why we study them. The text begins with an introduction to the fundamental molecular building blocks of cells: sugars, proteins, nucleic acids, and lipids and then moves on to illustrate how cells use these building blocks to perform their essential functions.

Principles Of Cell Biology - George Plopper - Bok ...

Cell Theory is one of the basic principles of biology. Credit for the formulation of this theory is given to German scientists Theodor Schwann (1810-1822), Matthias Schleiden (1804-1881), and Rudolph Virchow (1821-1902). The Cell Theory states: All living organisms are composed of cells.
