Step 1: A problem involving work can be solved using the formula $\frac{1}{T} = \frac{1}{A} + \frac{1}{B}$, where T = time working together, A = the time for person A working alone, and B = the time for person B working alone. In this case, one pipe is filling the pool and the other is emptying the pool so we get the equation: Step 2: Solve the equation created in the first step.

It is possible to solve word problems when two people are doing a work job together by solving systems of equations. To solve a work word problem, multiply the hourly rate of the two people working together by the time spent working to get the total amount of time spent on the job. Knowledge of solving systems of equations is necessary to solve these types of problems.
