This report documents an effort to collect data and create an automated database of air conditioner products and manufacturing firms. The survey encompassed approximately 1,300 US and free-world firms. The product database consists of information on air conditioners and related environmental control units of 6,000 to 60,000 BTU/hour (BTUH) cooling capacity. It includes US military standard and commercial off-the-shelf products. In addition to products, the database provides information on firms that provide support to air conditioning and related
