There was perhaps no region more opposed to Prohibition than Baltimore and Maryland. The Free State was defiant in its protest from thoroughly wet Governor Albert Ritchie to esteemed Catholic Cardinal James Gibbons. Maryland was the only state to not pass a "baby" Volstead enforcement act. Speakeasies emerged at Frostburg's Gunter Hotel and at Baltimore's famed Belvedere Hotel, whose famous owls' blinking eyes would notify its patrons if it was safe to indulge in bootleg liquor. More than 10 years ago, federal officials boldly claimed that they would create a 'drug-free America by 1995.' To reach that objective, Congress spent billions on police, prosecutors, drug courts, and prisons. Despite millions of arrests and countless seizures, America is not drug free. Illegal drugs are as readily available today as ever before. Drug prohibition has proven to be a costly failure. In *Our Right to Drugs*, Szasz shows how the present drug war started at the beginning of this century, when the US government first assumed the task of protecting people from patent medicines. By the end of World War I the free market in drugs was but a dim memory. Instead of dwelling on the familiar impracticality and unfairness of drug laws, Szasz demonstrates the deleterious effects of prescription laws, which place people under lifelong medical supervision. The result is that most Americans today prefer a coercive and corrupt command drug economy to a free market in drugs.

" "The remedy was worse than the disease. Intolerance led to indulgence".

The place of cannabis in global drug prohibition is in crisis, opening up new directions for socially engaged cannabis research. The *Routledge Handbook of Post-Prohibition Cannabis Research* invites readers to explore new landscapes of cannabis research under conditions of legalization with, not after, prohibition: "post-prohibition." The chapters are organized into five multidisciplinary sections: Governance, Public Health, Markets and Society, Ecology and the Environment, and Culture and Social Change. Case studies from the United States, Uruguay, Morocco, and the United Kingdom show readers alternative ways of thinking about human-cannabis relationships that move beyond questions of legality and illegality. Representing a cross-section of cannabis scholarship, the contributors provide readers with critical perspectives on legalization that are not based upon orthodoxies of prohibition. While legalization signals a global shift

in the legitimacy of cannabis research, this collection identifies openings for academics, policy makers, and the public interested in ending the drug war, as well as a way to address broader social problems evident in the age of neoliberal governance within which prohibition has been entangled.
