The work known as Pseudo-Kodinos, the fourteenth-century text which is one of two surviving ceremonial books from the Byzantine empire, is presented here for the first time in English translation. With facing page Greek text and the first in-depth analysis in the form of commentary and individual studies on the hierarchy, the ceremonies, court attire, the Blachernai palace, lighting, music, gestures and postures, this volume makes an important new contribution to the study of the Byzantine court, and to the history and culture of Byzantium more broadly. The unique traits of this ceremony book include the

combination of hierarchical lists of court officials with protocols of ceremonies; a detailed description of the clothing used at court, in particular, hats and staffs; an account of the functions of the court title holders, a description of the ceremonies of the year which take place both inside the palace and outside; the service of the megas domestikos in the army, protocols for the coronation of the emperor, the promotions of despot, sebastokrator and caesar, of the patriarch; a description of the mourning attire of the emperor; protocol for the reception of a foreign bride in Constantinople all these are analysed here. Developments in ceremonial since the tenth-century Book of Ceremonies are discussed, as is the space in which ceremonial was performed, along with a new interpretation of the ' other palace ', the Blachernai. The text reveals the anonymous authors' interest in the past, in the origins of practices and items of clothing, but it is argued that Pseudo-Kodinos presents descriptions of actual practice at the Byzantine court, rather than prescriptions.

Byzantium was dismissed by Gibbon, in the *Decline and Fall of the Roman Empire*, and his Victorian successors as a decadent, dark, oriental culture, given up to intrigue, forbidden pleasure and refined cruelty. This great empire, founded by Constantine as the seat of power in the East began to flourish in the fifth century AD, after the fall of Rome, yet its culture and history have been neglected by scholars in comparison to the privileging of interest in the Western and Roman Empire. Michael Grant's latest book aims to compensate for that neglect and to provide an insight into the nature of the Byzantine Empire in the fifth century; the prevalence of Christianity, the enormity and strangeness of the landscape of Asia Minor; and the history of invasion prior to the genesis of the empire. Michael Grant's narrative is lucid and colourful as always, lavishly illustrated with photographs and maps. He successfully provides an examination of a comparatively unexplored area and constructs the history of an empire which rivals the former richness and diversity of a now fallen Rome.

Atlantic – roughly from the emergence of Islam to the fall of Constantinople. These spheres drew on a shared pool of late antique Mediterranean culture, philosophy and science, and they had monotheism and historical antecedents in common. Yet where exactly political and spiritual power lay, and how it was exercised, differed. This book focuses on power dynamics and resource-allocation among ruling elites; the legitimisation of power and property with the aid of religion; and on rulers' interactions with local elites and societies. Offering the reader route-maps towards navigating each sphere and grasping the fundamentals of its political culture, this set of parallel studies offers a timely and much needed framework for comparing the societies surrounding the medieval Mediterranean.
