The two forms of quadratic equation are:

Standard form. In this form, the quadratic equation is written as: $f(x) = ax^2 + bx + c$ where a , b , and c are real numbers and a is not equal to zero. For example, two standard form quadratic equations are $f(x) = x^2 + 2x + 1$ and $f(x) = 9x^2 + 10x - 8$.

Functions Grafun Answer

This general curved shape is called a parabola. The U-shaped graph of any quadratic function defined by $f(x) = ax^2 + bx + c$, where a , b , and c are real numbers and $a \neq 0$, and is shared by the graphs of all quadratic functions. Note that the graph is indeed a function as it passes
