In this new edition of their groundbreaking book Strategies That Work, Stephanie Harvey and Anne Goudvis share the work and thinking they've done since the second edition came out a decade ago and offer new perspectives on how to explicitly teach thinking strategies so that students become engaged, thoughtful, independent readers. Thirty new lessons and new and revised chapters shine a light on children's thinking, curiosity, and questions. Steph and Anne tackle close reading, close listening, text complexity, and critical thinking in a new chapter on building knowledge through thinking-intensive reading and learning. Other fully revised chapters focus on digital reading, strategies for integrating comprehension and technology, and comprehension across the curriculum. The new edition is organized around three sections: Part I provides readers with a solid introduction to reading comprehension instruction, including the principles that guide practice, suggestions for text selection, and a review of recent research that underlies comprehension instruction. Part II contains lessons to put these principles into practice for all areas of reading comprehension. Part III shows you how to integrate comprehension instruction across the curriculum and the school day, particularly in science and social studies. Updated bibliographies, including the popular "Great Books for Teaching Content," are accessible online. Since the first publication of Strategies That Work, more than a million teachers have benefited from Steph and Anne's practical advice on creating classrooms that are incubators for deep thought. This third edition is a must-have resource for a generation of new teachers—and a welcome refresher for those with dog-eared copies of this timeless guide to teaching comprehension.

^This book adds extremely relevant knowledge and skills for innovative reformers and for more traditional leaders alike. It provides a solid set of interesting and shrewd suggestions that can be used immediately by practising principals - From the Foreword by Kent D Peterson, Professor, Department of Educational Administration, University of Wisconsin, Madison Despite the administrative leadership training that most principals receive in university courses, their most useful learning doesn t occur until they are on the job. And the new knowledge - much of it the result of trial and error, success and failure - is gained in relative isolation, simply because there is no one else at that responsibility level within the school. Pam Robbins, an educational consultant and Harvey B Alvy, a practicing principal, offer a well-organized, interactive manual for the role of principal. They have worked with hundreds of schools, educators, and other organizations around the world, collecting data that form the basis for The Principal s Companion. This easy-to-read book combines the most helpful ' tried-and-true ' strategies with the most relevant leadership research and theory. The authors discuss creative leadership and necessary skills, the wide variety of roles played by principals, how to create a ' learning community, ' personal and professional issues, and much more. Quotes from practicing principals are included throughout the book, and readers are encouraged to jot down their own reflections about each chapter theme. The Principal s Companion is a rare opportunity to ' collaborate ' with other principals - an excellent professional resource that will be referred to again and again. Ideal for practicing and aspiring principals, it is also highly useful as a text for administration courses.
