The women at Julie's International Salon share their experiences of bodily self-presentation, femininity, aging, and caring. Their own words are at the center of the book; the stories of their lives, fresh and compelling, are told here with affection. But beyond the stories themselves, Frida Kerner Furman explores the socio-moral significance of these beauty shop experiences, showing how they reveal as much about society at large as about older women. For in telling us how they perceive reality, make choices, and live in their worlds, the women of Julie's expose structures of power, inequality, and resistance in the larger world that all of us, young or old, beautiful or not, face every day.

My name is Tina Alberino, and I wrote this book to save you. This is not another lame book full of generic beauty business advice. This book serves as the literary equivalent of a kick in the ass and a punch to the throat. You hold in your hands compendium of harsh lessons and a raw depiction of the true nature of this industry. Provides tips for curly hair including shampooing, conditioners, drying, combing, styling, getting the right cut, and how to heal hair after years of strong detergents and damaging blow dryers.

Kinky, curly, or wavy hair isn't a problem hair—it's just hair with a different set of rules! For too long, hairstylists and hair-care companies have ignored the needs of women with kinky, curly, or wavy hair, focusing on it as a problem hair rather than celebrating its unique texture. But now hair-care and style expert A. Dickey, considered by top magazine beauty editors to be the foremost authority on caring for, cutting, and styling

curly hair, has written Hair Rules! to end the frustration faced by women with curly hair every day. Hair Rules! is chock-full of simple tips for all types of curly hair and covers everything from the best shampoos and conditioners to use, to damage-free hair-drying (dust off that hood dryer!), the use of natural oils, and the safest coloring, styling, and chemical relaxing techniques—as well as guidelines for maintaining healthy, gorgeous hair. “My mission,” writes Dickey, “is simple: to advise and encourage all women with nonstraight hair to strive to attain their beauty, whatever their ethnicity, and whatever their tastes.”

Food processing is now the biggest industry in the UK and in many other countries. It is also rapidly changing from what was essentially a craft industry, batch processing relatively small amounts of product, to a very highly automated one with continuously operating high speed production lines. In addition, consumers have developed a greater expectation for consistently high standard products and coupled this with demands for such things as a more natural flavour, lower fat etc. The need for an increased knowledge of the scientific principles behind food processing has never been greater. Within the industry itself, increased automation, company diversification and amalgamations etc. have meant that those working in it have often to change their field of operation. Whereas twenty years ago, someone starting work in one branch of the food industry could expect, if he or she so desired, to work there all their working lives, this is now seldom the case. This means that a basic knowledge of the principles behind food processing is necessary both for the student at university or college, and for those already in the industry. It is hoped, therefore, that this book will appeal to both, and prove to be a useful reference over a wide range of food processing.
