different intervention strategies to existing social problems. The book is organized around seven main themes, namely: science; logic and objectivity in the social sciences; conceptualization, design and problem definition; types of social science research; sampling and research instruments; data processing and analysis; and theory building and presentation of research findings. Each chapter is treated at length, including illustrative examples from the literature and providing data from the author's own research experience, specifically drawing examples from a variety of Tanzanian social settings. Since the first edition of this book there has been an unprecedented rise of sophistication and diversification in the realm of social science research. The challenges, which continue to face researchers, include

ensure the underlying research is sound. Transparent and Reproducible Social Science Research is the first book to summarize and synthesize new approaches to combat false positives and non-reproducible findings in social science research, document the underlying problems in research practices, and teach a new generation of students and scholars how to overcome them. Understanding that social science research has real consequences for individuals when used by professionals in public policy, health, law enforcement, and other fields, the book crystallizes new insights, practices, and methods that help ensure greater research transparency, openness, and reproducibility. Readers are guided through well-known problems and are encouraged to work through new solutions and practices to
