Ada is the programming language of
choice for high integrity software systems
and is used extensively in industries such
as transportation and aerospace. This
textbook is intended for experienced
programmers (advanced students and
practicing software engineers) who need
to master software design and

programming in Ada.

The second irony is that the Ada mandate, meant to force DoD software projects to catch up with progress in software engineering by retiring older approaches,

has also had in the ensuing years the probably unintended effect of slowing down the adoption of newer (post-Ada) technology by the military-aerospace community. The lessons of Ada remain irreplaceable, and it is a pity that many of the O-O languages

Norman Cohen's book "Ada as a second
language" is very approachable, but only
covers topics up to Ada95 (Ada 2005)
therefore not covered. For concurrent
programming in Ada, a great resource is
"Concurrency by Ada", again by Burns
and Wellings. This book covers topics up
to Ada95.
