examples and exercises drawn from the world around us and emerging technologies. Every example problem is broken down in a consistent “step-by-step” manner that emphasises a “Problem Solver's Approach” which builds from chapter to chapter and moves from easily solved problems to progressively more difficult ones. Engineering Mechanics is also accompanied by McGraw-Hill Connect which allows the professor to assign homework, quizzes, and tests easily and automatically grades and records the scores of the students' work. Most problems in Connect are randomised to prevent sharing of answers and most also have a “multi-step solution” which helps move the students' learning along if they experience difficulty.
