Risk Assessment and Risk Register - bcpft.nhs.uk

A risk register (which can sometimes be referred to as a risk log) is a project management tool which helps managers and companies document risks, track risks and address them through preventative controls and corrective actions. A risk register is typically created at the start of a project (before it begins), and is regularly referenced and updated throughout the life of a project through deliberate risk monitoring and control.

with principles of Project Risk Management as presented in this practice standard.

This is an update and expansion upon PMI's popular reference, The Practice Standard for Project Risk Management. Risk Management addresses the fact that certain events or conditions may occur with impacts on project, program, and portfolio objectives. This standard will: identify the core principles for risk management; describe the fundamentals of risk management and the environment within which it is carried out; define the risk management life cycle; and apply risk management principles to the portfolio, program, and project domains within the context of an enterprise risk management approach It is primarily
