Malcolm is also bothered by his inability to tell the most important people in his life that he identifies as gray ace. Stuart Morgan has a secret of his own. Though years have passed since the tattooed chef fled the Mormon church in Utah for New York, he's never truly come to terms with the fetish that ruined that rigid but outwardly perfect life. Experience has also taught Stuart that keeping his love of lacy things under wraps is safer than telling the truth. After Malcom's boss, Carter, hires Stuart's restaurant to cater a gala fundraising event, the strait-laced Malcolm is thrown together with badass biker Stuart. Despite their differences and a couple of false starts, the men discover they work well together and a friendship quickly forms. As Malcolm's feelings for Stuart deepen, his sexuality awakens, but he remains tight-lipped about his problems. And though Stuart grows more and more attached to Malcolm, he remains fearful of confessing his fetish. When both of their secrets are finally exposed, they find themselves at a crossroads in which they must choose between playing it safe or finally coming clean to the person they love.

Between Television, Movies, Books, Newspapers, the Internet and even the person next door... today's moral values have been compromised to the extent that, for most people, they no longer agree with God's values and God's Laws. You have people today who are so concerned with being "politically correct" and "not offending anyone" that they see SIN all around them and say or do nothing. So others come to believe that the SIN is "acceptable," even "normal" behavior. This book will attempt to show the average Christian what God really expects... and what he really rejects, when dealing with many of today's most confusing questions. Each question will be covered in one chapter, so the answers will be quick and easy to find, allowing Bible scriptures to guide the reader to their answers.

Even a man on the run can enjoy the thrill of the chase... Hiding from New York's Irish mob, Liam O'Brien is in Ireland working as a bartender in his parents' old village. Growing up in the eighties in East London was no picnic. Proper hard bastards, wannabe villains and cockney wide boys everywhere you went, all looking to make their mark. With trouble at home and more at school, Danny Dyer didn't have many options. He was a rascal, running with a tough crowd, getting himself into scrapes with the Old Bill, on the verge of becoming just another nobody. Until he started to act. It came naturally to him. He landed role after role, working with big stars, making a name for himself. And then came Human Traffic, and his career went into overdrive. Fame opened doors into the best clubs, the best booze and even better drugs. But with the highs came the lows, and as the drinks flowed, the work dried up. Shut out of an industry that didn't understand him, that heard his reputation before bothering with his talent, he had no choice but to turn it around and sort himself out. This is the real story - straight up. Funny, honest, full of swagger, and jammed full of antics and anecdotes, this memoir tears it up proper and delivers on every page.

In 2009, Rolling Stone named Joe Romm to its list of "100 People Who Are Changing America." Romm is a climate expert, physicist, energy consultant, and former official in the Department of Energy. But it's his influential blog, one of the "Top Fifteen Green Websites" according to Time magazine, that's caught national attention. Climate change is far more urgent than people understand, Romm says, and traditional media, scientists, and politicians are missing the story. Straight Up draws on Romm's most important posts to explain the dangers of and solutions to climate change that you won't find in newspapers, in journals, or on T.V. Compared to coverage of Jay-Z or the latest phandering politician, climate change makes up a pathetically small share of news reports. And when journalists do try to tackle this complex issue, they often lack the background to tell the full story. Despite the dearth of reporting, polls show that two in five Americans think the press is actually exaggerating the threat of climate change. That gives Big Oil, and others with a vested interest in the status quo, a huge opportunity to mislead the public. Romm cuts through the misinformation and presents the truth about humanity's most dire threat. His analysis is based on sophisticated knowledge of renewable technologies, climate impacts, and government policy, written in a style everyone can understand. Romm shows how a 20 percent reduction in global emissions over the next quarter century could improve the economy; how we can replace most coal and with what technologies; why Sarah Palin wears a polar bear pin; and why controversial, emerging technologies like biochar have to be part of the solution. The ultimate solution, Romm argues, is bigger than any individual technology: it's citizen action. Without public pressure, Washington and industry don't budge. With it, our grandkids might just have a habitable place to live. "The Web's most influential climate-change blogger" and "Hero of the Environment 2009" "Time Magazine "I trust Joe Romm on climate." "Paul Krugman, New York Times "America's fiercest climate-change activist-blogger" and one of "The 100 People Who Are Changing America" "Rolling Stone "One of the most influential energy and environmental policy makers in the Obama era" "U.S. News & World Report "The indispensable blog" "Thomas Friedman, New York Times "One of the most influential energy and environmental policy makers in the Obama era" "U.S. News & World Report "The
