published. The book examines the underlying principles that guide effective teaching in an age when all of us, and in particular the students we are teaching, are using technology. A framework for making decisions about your teaching is provided, while understanding that every subject is different, and every instructor has something unique and special to bring to their teaching.

new space for teaching and learning, and it is growing and developing each day. As online educators, we must grow and develop along with it, taking advantage of the suite of new digital tools and resources available to us, but also understanding and respecting the fundamental changes in the relationship between a student and an educator.

Understanding Education in the age of Digital Divide ...

As we celebrate World Teachers' Day, the British Council's Sophie Partarrieu argues that face-to-face teaching still has an essential place in today's education. World Teachers' Day is a relatively new celebration, established by the United Nations Educational, Scientific and Cultural Organization (UNESCO) in 1994 to highlight the vital contribution teachers make to education.

Why we still need face-to-face teaching in

the digital age ...

Education is moving into the digital age. Pedagogies have changed to engage the latest digital technologies. The methods of distribution are now a blend between face-to-face and some other combination of virtual interfaces. The content is moving from traditional text-based learning to text-plus-multimedia.

evolved, but the way it is taught is largely unchanged. July 17, 2017 by Eric Hazan. The education system still performs the same function it always has, which is to “teach one to think intensively and to think critically . . . intelligence plus character, that is the goal of true education,” as Martin Luther King Jr. put it.
