Traditional critical editing, defined by the paper and print limitations of the book, is now considered by many to be inadequate for the expression and interpretation of complex works of literature. At the same time, digital developments are permitting us to extend the range of text objects we can reproduce and investigate critically - not just books, but newspapers, draft manuscripts and inscriptions on stone. Some exponents of the benefits of new information technologies argue that in future all editions should be produced in digital or online form. By contrast, others point to the fact that print, after more than five hundred years of development, continues to set the agenda for how we think about text, even in its non-print forms. This important book brings together leading textual critics, scholarly editors, technical specialists and publishers to discuss whether and how existing paradigms for developing and using critical editions are changing to reflect the increased commitment to and assumed significance of digital tools and methodologies.

This volume explores how reproduction and reproducibility impact artistic and literary creation while also examining the ways in which reproducibility impacts our practices and disciplines. Ce volume explore l'impact de la reproduction et de la reproductibilité sur la création artistique et littéraire, mais aussi l'impact de la reproductibilité sur nos pratiques et sur nos disciplines.
