Built Environment Collaborative is an initiative to bring boundary fields of architecture, planning, technology, and sustainability studies at a conjecture to construct a holistic perspective for designers and professionals to influence the future course of development. .

Built Environment Collaborative - Habitat Studies ...

Built Environment. Our built environment includes all the human-made physical spaces where we live, recreate and work. These include our buildings, furnishings, open and public spaces, roads, utilities and other infrastructure. These structures and spaces affect our health by bringing pollutants into our environments and by allowing or restricting access to physical activity, transportation and social interactions.
