Moon used to be a lot closer to the Earth. It is a story of a love triangle between people that jump between the Earth and the Moon.

The Distance of the Moon by Italo
Calvino - Goodreads

Un-commissioned | New Talent. Why did you make this work: ' The Distance of the Moon ' is a wonderfully surreal short story by Italo Calvino, based around the idea that the moon used to be very close to the earth, and people would jump between them, collecting 'moon milk'. I illustrated it as a risograph comic to challenge myself to create a silent narrative and to interpret the otherworldly nature of a story which I have always hugely admired.

The Distance of the Moon Analysis -
eNotes.com

The Moon is slowly moving away from Earth. Don ' t worry! It is only going 3.8cm away each year, and we won ' t notice a difference for some time! You weigh less on the Moon than you do on Earth. This is because the moon has a much weaker level of gravity than Earth. This is due to the satellites smaller mass.

scientific fact, [1] and we are given a tale by the irrepressibly present Qfwfq, who seems to have been around for most events in the history of the universe.

The Distance of the Moon by Italo Calvino (Reading ...

We also know the length of side AS, which is just the chord distance between Athens and Selsey, about 2360 kilometers. If we make the simplifying assumption that triangle ASM is isosceles (that SM and AM are the same length), then the distance to the Moon is just $(\text{length of AS}) / (2 \tan(\text{parallax} / 2))$
