The British empire was a huge enterprise. To foreigners it more or less defined Britain in the nineteenth and early twentieth centuries. Its repercussions in the wider world are still with us today. It also had a great impact on Britain herself: for example, on her economy, security, population, and eating habits. One might expect this to have been reflected in her society and culture. Indeed, this has now become the conventional wisdom: that Britain was steeped in imperialism domestically, which affected (or infected) almost everything Britons thought, felt, and did. This is the first book to examine this assumption critically against the broader background of contemporary British society. Bernard Porter, a leading imperial historian, argues that the empire had a far lower profile in Britain than it did abroad. Many Britons could hardly have been aware of it for most of the nineteenth century and only a small number was in any way committed to it. Between these extremes opinions differed widely over what was even meant by the empire. This depended largely on class, and even when people were aware of the empire, it had no appreciable impact on their thinking about anything else. Indeed, the influence far more often went the other way, with perceptions of the empire being affected (or distorted) by more powerful domestic discourses. Although Britain was an imperial nation in this period, she was never a genuine imperial society. As well as showing how this was possible, Porter also discusses the implications of this attitude for Britain and her empire, and for the relationship between culture and imperialism more generally, bringing his study up to date by including the case of the present-day USA.

The arrival of a strict substitute convinces Miss Nelson's students that they must get their teacher back.

This anthology explores the recurring trope of the dead or absent mother in Western cultural productions. Across historical periods and genres, this dialogue has been employed to articulate and debate questions of politics and religion, social and cultural change as well as issues of power and authority within the family. Åström seeks to investigate the many functions and meanings of the dialogue by covering extensive material from the 1200s to 2014 including hagiography, romances, folktales, plays, novels, children's literature and graphic novels, as well as film and television. This is achieved by looking at the discourse both as products of the time and culture that produced the various narratives, and as part of an on-going cultural conversation that spans the centuries, resulting in an innovative text that will be of great interest to all scholars of gender, feminist and media studies.
