While their victory ensured the Turks' survival, the conquest of Constantinople marked the end of Byzantine civilization for the Greeks, by triggering the scholarly exodus that caused an influx of Classical studies into the European Renaissance.

This major study is a comprehensive scholarly work on a key moment in the history of Europe, the fall of Constantinople to the Ottoman Turks in 1453. The result of years of research, it presents all available sources along with critical evaluations of these narratives. The authors have consulted texts in all relevant languages, both those that remain only in manuscript and others that have been printed, often in careless and inferior editions. Attention is also given to 'folk history' as it evolved over centuries, producing prominent myths and folktales in Greek, medieval Russian, Italian, and Turkish folklore. Part I, The Pen, addresses the complex questions introduced by this myriad of original literature and secondary sources.

The fall of Constantinople to the Ottomans in 1453 marked the end of a thousand years of the Christian Roman Empire. Thereafter, world civilisation began a process of radical change. The West came to identify itself as Europe; the Russians were set on the path of autocracy; the Ottomans were transformed into a world power while the Greeks were left exiles in their own land. The loss of Constantinople created a void. How that void was to be filled is the subject of this book. Michael Angold examines the context of late Byzantine civilisation and the cultural negotiation which allowed the city of Constantinople to survive for so long in the face of Ottoman power. He shows how the devastating impact of its fall lay at the centre of a series of interlocking historical patterns which marked this time of decisive change for the late medieval world. This concise and original study will be essential reading for students and scholars of Byzantine and late medieval history, as well as anyone with an interest in this significant turning point in world history.

Byzantium was the last bastion of the Roman Empire following the fall of the Western Roman Empire. It fought for survival for eight centuries until, in the mid-15th century, the emperor Constantine XI ruled just a handful of whittled down territories, an empire in name and tradition only. This lavishly illustrated book chronicles the history of Byzantium, the evolution of the defenses of Constantinople and the epic siege of the city, which saw a force of 80,000 men repelled by a small group of determined defenders until the Turks smashed the city's protective walls with artillery. Regarded by some as the tragic end of the Roman Empire, and by others as the belated suppression of an aging relic by an ambitious young state, the impact of the capitulation of the city resonated through the centuries and heralded the rapid rise of the Islamic Ottoman Empire.

By 1400, the once-mighty Byzantine Empire stood on the verge of destruction. Most of its territories had been lost to the Ottoman Turks, and Constantinople was under close blockade. Against all odds, Byzantium lingered on for another fifty years until 1453, when the Ottomans dramatically toppled the capital's walls. During this bleak and uncertain time, ordinary Byzantines faced difficult decisions to protect their livelihoods and families against the death throes of their homeland. In this evocative and moving book, Jonathan Harris explores individual stories of diplomatic maneuverings, covert defiance, and sheer luck against a backdrop of major historical currents and offers a new perspective on the real reasons behind the fall of this extraordinarily fascinating empire.

In the spring of 1453, the Ottoman Turks advanced on Constantinople in pursuit of an ancient Islamic dream: the capture of the thousand year-old capital of Christian Byzantium. This text is an intense, extraordinary tale of courage and cruelty, technological ingenuity, endurance and luck.

This title details the epic four-month siege of the city of Constantinople, last vestige of the once mighty Roman and Byzantine Empires. Mehmet 'The Conqueror' led an army of 80,000 men with a massive siege train against the city. Defending were a mere 10,000 men under the Emperor Constantine XI. The Turkish artillery battered the ancient city walls mercilessly, levelling a large section. A gallant defence held off the massive Turkish assault for several hours. Refusing appeals to flee, Constantine returned to the breaches and fought until overwhelmed and killed. Thus died the last Emperor of the Byzantines and with him his once glorious empire. David Nicolle examines one of the most famous military encounters in history, which marked the final demise of the Roman/Byzantine Empire.

Byzantines, Latins, and Turks in the Eastern Mediterranean World after 1150 is a collection of thirteen original articles which focus on the religious identity, cultural exchange, commercial networks, and the construction of political legitimacy among Christians and Muslims in the late Medieval eastern Mediterranean.
