The new edition of Nursing Care Planning Made Incredibly Easy is the resource every student needs to master the art of care planning, including concept mapping. Starting with a review of the nursing process, this comprehensive resource provides the foundations needed to write practical, effective care plans for patients. It takes a step-by-step approach to the care planning process and builds the critical thinking skills needed to individualize care in the clinical setting. Special tips and information sections included throughout the book help students incorporate evidence-based standards and rationales into their nursing interventions.

"The book is clearly written and concise and uses sidebars to highlight core concepts." Score: 90, 4 stars --Doody's Because ER nurses need to think fast and act fast... Fast Facts for the ER Nurse is an orientation guide and reference, designed specifically for new ER nurses and the preceptors responsible for their orientation. The chapters provide a brief overview of equipment, treatments, and drugs used to manage common disorders and conditions frequently seen in the ER. Critical information presented in each chapter includes disorder definitions, signs and symptoms, interventions, and critical thinking questions. With this guide, nurses can get the information they need fast in bullet-point lists. Each chapter is conveniently organized alphabetically by disease and disorder for quick access. The book serves as an organized, reliable, and thorough ER guide, ensuring a structured approach to orientation. All new ER nurses and their preceptors will find this book to be a reference they cannot do without. Key topics covered include: Cardiovascular Emergencies Disaster Response Emergencies Infectious Disease Emergencies Mental Health Emergencies Shock and Multisystem Trauma Emergencies Substance Abuse and Toxicologic Emergencies And many more!

As the required textbook for NAEMTUs worldwide prehospital trauma life support courses, this is the definitive resource for learning basic and advanced prehospital trauma skills and concepts. Now revised and expanded to cover all aspects of military prehospital trauma with 12 new chapters, this edition is tailored expressly for the military.

We created this FILL-IN-THE-BLANK, ANCC review book to assist you in your nurse practitioner board exam preparation efforts. Science shows writing things down helps with information retention, so we've made it possible to write all the notes and highlight all the things so you can become an #NPin5minutes!This workbook will ONLY be beneficial to those of you who have access to the ANCC Slide Review Course, ANCC Max Bundle or the Ultimate Max Bundle through Latrina Walden Exam Solutions! All the answers can be found in the power points available in the ANCC PowerPoints Section of the course work. As you work through the ANCC PowerPoints and videos in the ANCC Slide Review Course, ANCC Max Bundle or Ultimate Max Bundle at Latrina Walden Exam Solutions, follow along with these engaging outlines that frame and organize clinical information critical for passing boards.

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities
