On July 4, 1990, while on a morning walk in southern France, Susan Brison was attacked from behind, severely beaten, sexually assaulted, strangled to unconsciousness, and left for dead. She survived, but her world was destroyed. Her training as a philosopher could not help her make sense of things, and many of her fundamental assumptions about the nature of the self and the world it inhabits were shattered. At once a personal narrative of recovery and a philosophical exploration of trauma, this book examines the undoing and remaking of a self in the aftermath of violence. It explores, from an interdisciplinary perspective, memory and truth, identity and self, autonomy and community. It offers imaginative access to the experience of a rape survivor as well as a reflective critique of a society in which women routinely fear and suffer sexual violence. As Brison observes, trauma disrupts memory, severs past from present, and incapacitates the ability to envision a future. Yet the act of bearing witness, she argues, facilitates recovery by integrating the experience into the survivor's life's story. She also argues for the importance, as well as the hazards, of using first-person narratives in understanding not only trauma, but also larger philosophical questions about what we can know and how we should live. Bravely and beautifully written, Aftermath is that rare book that is an illustration of its own arguments.

"Rich with expert, practical guidance for therapists, this book presents an evidence-based group treatment approach for survivors of interpersonal trauma. This time-limited treatment is designed for clients who have achieved basic safety and stability in present-day life and who are ready to work on the more enduring ways that trauma has harmed their self-perception and relationships. Vivid case examples and transcripts illustrate the process of screening, selecting, and orienting group members and helping them craft and work toward individualized goals, while optimizing the healing power of group interactions. In a convenient large-size format, the book includes reproducible handouts, worksheets, and flyers"--Provided by publisher.

While recent years have seen a vast increase in the literature on adult trauma, interest in childhood trauma has only recently started to gain momentum, encouraging new research and evidence-based interventions. Here the editors have brought together an international list of contributors to look at both innovative and established treatments of trauma in a range of contexts, and provide up-to-date coverage of what is on offer in prevention, assessment, treatment and research. Divided into three parts, main topics discussed are: risk and protective factors for the development of post-traumatic disorders conceptualizations of resilience and suggestions for making them operational evidence-based treatment models for traumatized children Treating Traumatized Children provides professionals with an up-to-date international perspective on the subject, as well as helping professionals and researchers develop future treatments based on current evidence.

Principles of Trauma Therapy provides a creative synthesis of cognitive-behavioral, relational/psychodynamic, and psychopharmacologic approaches to the "real world" treatment of acute and chronic posttraumatic states. Grounded in empirically-supported trauma treatment techniques, and adapted to the complexities of actual clinical practice, it is a hands-on resource for both front-line clinicians in public mental health and those in private practice.

Many counselors are not adequately prepared to help those suffering from complex posttraumatic stress disorder (C-PTSD). In this updated text, Heather Davediuk Gingrich provides an essential resource for Christian counselors, ably integrating the established research on trauma therapy with insights from her own thirty years of experience and an understanding of the special concerns related to Christian counseling.

Infused with clinical wisdom, this book describes a supportive group treatment approach for survivors just beginning to come to terms with the impact of interpersonal trauma. Focusing on establishing safety, stability, and self-care, the Trauma Information Group (TIG) is a Stage 1 approach within Judith Herman's influential stage model of treatment. Vivid sample transcripts illustrate ways to help group participants deepen their understanding of trauma, build new coping skills, and develop increased compassion for themselves and for one another. In a large-size format for easy photocopying, the volume provides everything needed to implement the TIG, including session-by-session guidelines and extensive reproducible handouts and worksheets. Purchasers get access to a companion website where they can download and print the reproducible materials from the book, as well as an online-only set of handouts and worksheets in Spanish. See also The Trauma Recovery Group, by Michaela Mendelsohn, Judith Lewis Herman, et al., which presents a Stage 2 treatment approach for clients who are ready to work on processing and integrating traumatic memories.
