The statutory definition of disability and the concept of being "otherwise qualified" for a job are also discussed in-depth. And you'll see exactly what employers, business owners, and providers of governmental services must do to make "reasonable accommodation." Plus, a comprehensive section that organizes case law by type of physical and mental impairment and accommodation by type of job requirement, making analysis easier. The first module focuses on the Windows platform, which is one of the most common OSes, and managing its security spawned the discipline of IT security. Kali Linux is the premier platform for testing and maintaining Windows security. Employs the most advanced tools and techniques to reproduce the methods used by sophisticated hackers. In this module first, you'll be introduced to Kali's top ten tools and other useful reporting tools. Then, you will find your way around your target network and determine known vulnerabilities so you can exploit a system remotely. You'll not only learn to penetrate in
